

TOGETHER WE CAN BE ENVIRONMENTALLY FRIENDLY!

Hi there parents! This week we observed green week where we participated in activities that teach your children about what it means to reduce, reuse and recycle and how we can do you part to contribute to being environmentally friendly. There are many small things everyone can do to have a big impact. If everyone does their part, we can work together to increase sustainability of the planet.

*Reduce.
Reuse.
Recycle.*

We participated in environmentally friendly arts and craft to learn about recycling and sustainability to teach everyone that taking care of the environment can be creative and fun!

During group time we read a book about rubbish, recycling and protecting our planet. 'What A Waste' By Jess French talked about the impact of waste not only on the land but in the sea and how this can impact our precious animals.

On Thursday mornings the children get very excited when they hear the garbage truck in our street. We all line up and link hands to walk and sit along the fence as they watch the waste in the garbage bins get emptied by the truck. We wave goodbye to the garbage man as he honks his horn and waves back as he drives away.

As a group during lunch time the children brought up the colours of the bins they have at home. We went on further to discuss what each colour represents and examples of what we put in the different bins and how this helps organise waste to reuse, reduce and recycle.

HOW CAN I HELP?

- Recycle everything
- Don't waste food
- Switch to renewables
- Turn off your electricals
- Try to cut out plastic
- Grow your own plants and veggies
- Use organisational waste bins
